

AD16

Indicator Light

OPERATION INSTRUCTION

Standard: IEC 60947-5-1

CNC

Deliver
Power For Better Life

-  Before installing and using this product, please read this manual carefully and pay more attention to safety.

AD16 series

Instruction

1 General

1.1 AD16 series indicator light adopt the LED chip as its light source so that it has the characteristic of long life, low consumption, small in size and light in weight, and the radiance of this series light is over 100 lumen. The product is suitable for being used as the indicator light, distant signal, fault signal in circuit of electric power, telecommunications, machine tools, shippings, spinings, printing, mining or other mechanical equipments.

2 Basic parameters

2.1 Type designation

AD16 -22/16 12

2.1 AD16 series auxiliary code

| Auxiliary Code | | | |
|--------------------------|---|-------|--|
| 1:A, B, C, D, E, F | stands for different appearance | 2:F | Stands for the electric discharge lamp which can be installed in the capacitor box |
| 2:S | Short case, empty means long case | 12:SM | Stands for Flash Buzzer |
| 12:FM | Stands for buzzer | 12:s2 | Stands for flash double colors indicator light |
| 12:S1 | Stands for Double colors indicator light | 12:WG | Stands for isolator switch position indicator light |
| 12:WY | Stands for Breaker position indicator light | 12:WN | Stands for earth wire indicator light |

3 AD16 series parameters

3.1 Performance characteristic

- Continuous working life: ≥ 30000 hours
- Allowed Instantaneous voltage fluctuation: $\pm 20\%$
(More than 110)
- Power frequency withstand voltage: 2.5Kv, 1min
- Operating frequency(AC): 50~60Hz
- Rated working current: ≤ 20 mA

-Specular Level $>100\text{cd/m}^2$

-Comparative tracking index $\text{CT1} \geq 100$, flame retardant

-Insulation resistance: $U_i \leq 60\text{V} = 5\text{M}\Omega$, $60 \leq U_i \leq 660\text{V} = 50\text{M}\Omega$

-Emitting color: red, green, yellow, white, blue

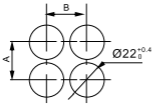

-Specular Level $>100\text{cd/m}^2$

-Comparative tracking index $\text{CT1} \geq 100$, flame retardant

-Insulation resistance: $U_i \leq 60\text{V} = 5\text{M}\Omega$, $60 \leq U_i \leq 660\text{V} = 50\text{M}\Omega$

-Emitting color: red, green, yellow, white, blue

4 AD16 series opening pore requirement

| | |
|--|---|
|  | <ol style="list-style-type: none">1. the distance between every opened pore should more than 30mm2. The thickness of installation panel: 1-6.5mm |
|--|---|

5 Installation method

5.1 For AD16 series, firstly screw down the nut to the product cover into the panel. Then screw back the nut tightly. Users can install the AD16 indicator light by our dedicated wrench so that you can save much more time.

CERTIFICATE

Product Model: AD16

Standard: IEC 60947-5-1

Inspector: CNC 003

Production date: Printed on the product
or package.

This product is qualified according
to the delivery inspection

A red rectangular box containing the white text 'CNC'.
