YCB9-125 Series

Miniature Circuit Breaker Instruction

1 General

YCB9-125 miniature circuit breaker(circuitbreaker) is applicable to the circuit with AC50 Hz/60Hz, rated voltage of no more than400 V, and rated current from 63A to 125Afor overload protection and short circuit protection. This product can be applied to various places such as industrial, commercial, tall buildings, and residential houses.

Standard: IEC 60947-2, IEC 60898-1.

2 Operating conditions

2.1 Ambient air temperature $-5^{\circ}\text{C}\sim+40^{\circ}\text{C}$ (with daily average $\leq 35^{\circ}\text{C}$)

2.2. Altitude: $\leq 2000\text{m}$.

2.3 Air conditions: At mounting site, relative humidity not exceed 50% at the maximum temperature of $+40^{\circ}\text{C}$. For the wettest month, the maximum relative humidity averaged shall be 90% while the lowest temperature averaged in that month is $+20^{\circ}\text{C}$, special measures should be taken to occurrence of condensation.

2.4 The installation category is III.

2.5 The circuit breaker shall be installed on DIN rail EN 60715(35mm), which shall meet the A1.1 TH 35 -7.5 steel mounting rail requirements.

2.6 Pollution grade: 3

2.7 Mounting conditions: inclination between mounting plane and vertical plane not exceed $\pm 5^\circ$.

2.8 The product should locate in the places where there are no obvious impact and shake.

3 Type designation

3.1 Type designation

3.2 The basic specifications and main technical parameters of the circuit breaker are shown in Table 1; The overcurrent protection characteristics are shown in Table 2.

c	100A	8I _n	cold state	t ≥ 0.2s	Not tripping	Turn on the power supply by closing the auxiliary switch
d	125A					12I _n

Note: The terminology "Cold state" means that the test is performed at the base calibration temperature with no load prior to the test.

3.3 Mechanical and Electrical life

Electrical life: 1500 times

Mechanical life: 8000 times

3.4 Wire connection

Before installation, check whether technical parameter of the circuit breaker is in conformity with user's requirement.

The conductor of power supply shall be connected to the up terminal of circuit breaker. During installation, the tightening torque is max 3.5~5N·m. The sectional area of connecting wire can refer to Table 3.

5 Ordering instruction

5.1 When ordering, the customer shall indicate the product type, tripping curve, rated current, number of poles, accessories and quantity of the circuit breaker. For example: YCB9-125 3P100A 1000pcs.

5.2 Customers can negotiate separately if you have special requirements .
